### TYPICAL APPLICATIONS

- Fruit and vegetables
- Cucumbers
- Punnets
- Bottles
- Cartons and boxes

- Solid construction and mechanically simple
- Each labeler pivots independently
- Minimises downtime and facilitates change of labels
- Labeller can easily be mounted on a variety of graders, singulators and conveyers
- Versatility within the packing shed environment
- Labeller is self-contained, requires a light frame and single phase power supply
- Automatic wake-up activated by arm trigger or computer signal
- Simple connection to a computer grader for selective labelling and monitoring
